YARN

COTTON LIKE YARN

Characteristic

Cotton-Like Yarn is a high-quality fiber that mimics natural touch hand-feel property of cotton in the synthetic filament and bringing extraordinary comfort to skin.

A unique fiber texturizing process is applied to create rich volume and texture as cotton yarn.

On top of that, Cotton-Like Yarn can offer the beneficial qualities of functional fibers such as Moisture Management, Mechanical Stretch, UV Cut, Lofty and Form Stability.

Most importantly, Little King's Cotton-Like Yarn can be not only 100% recycled but also made into heather or fancy blend version based on end use.

Natural touch

(Soft and Micro powdery hand feel)

The micro denier fiber featured in Cotton-Like Yarn creates powdery touch through the fine surface.

More comfortable to wear, and stay dry all day. Once you wear it, you understand the extreme smoothness and natural hand feel.

Easy Care & Anti-pilling Resistance

Better than staple fiber, textiles made from Cotton-Like Yarn will always be comfortable and maintain a beautiful shape even after machine washing or tumble drying.

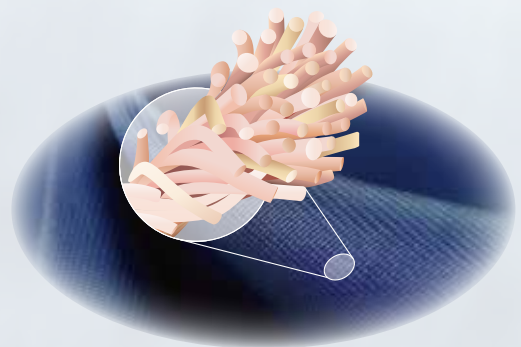

It is designed for the soft and long-lasting quality.

Technology

Cotton-Like Yarn is a next generation functional material that creates the cottony appearance and hand feel.

The unique spinning technology originates multi-level structure that makes the fiber soft, bulky and shape-stable.

With the outstanding performance, Cotton-Like Yarn can be used in sports performance and sportswear for all categories.
